

Management of Change

Consistent, controlled and configurable MOC processes

Mitigate risks and hazards with Oplii's powerful MOC tools which ensure changes follow proper protocol, from assessment to approval, through implementation and completion.

A powerful engine combined with an easy-to-use UI brings simplicity and visibility into complex processes.

With clearly defined and organized workflows, Oplii takes the guess work, tracking effort and inconsistency out of the MOC process to support safety and sustainability in the workplace.

Smartest workflows yet

With Oplii, you can create unlimited workflow schemes based on:

- **Type** of change
- **Location** of change
- **Risk Level** of change

These factors determine the path of a change request, via configurable:

- **Trigger questions**
- **Risk matrixes**
- **Status changes**
- **Approvers**
- **Approval requirements**
- **Notifications**
- **Closeout checklists**
- **User permissions**
